

## A SMART SOFTWARE-SUITE FOR SEISMIC MIGRATION

**Use Fraunhofer's RTM** for complex-structure imaging

- TTI, angle gathers, post-processing
- Designed for best scalability and runtime-stability

**Use Statoil-Fraunhofer's GRT** for true-amplitude sub-surface angle gathers

- TTI, signal/noise enhancement, diffraction imaging
- Designed for easy usage and highest flexibility

**Use Fraunhofer's Beam migrations** for interactive PSDM model building

- TTI, offset gathers
- Adapts to the data quality and acquisition geometry
